ABOUT THE SEMINAR -

Software plays an important role in the field of Mathematics. Mathematical softwares are useful to model numeric and geometric data. Mathematical Softwares help to develop visual understanding. It helps to increase student motivation and improve student's attitudes towards Mathematics. It allows students to concentrate on problem formulation, simulation and analysis. It will help teachers to develop innovative, challenging and exploratory teaching modules. Researchers do not need to spend more time on tedious. People from other disciplines not having sound mathematical knowledge can very easily solve mathematical problems by using these Software.

Mathematical softwares like Mathematica, Maple, Python, LATEX, Maxima have potential to facilitate an active approach to learning. These Softwares have most of the features of numerical systems for visualization of 2D and 3D-plots, numerical computations and animations.

Considering these things Savitribai Phule Pune University has offered practicals on Mathematical software for Undergraduate Students from current year in CBCS system.

Thus, the seminar attempts to enlighten the students, teachers and researchers. At the same time scholarly discussion, deliberations and practice session would certainly enrich the participants.

You are requested to be present and kindly depute at least two students of your college / Institute. Accommodation will be provided at holy place of Lord Sai Baba's Shirdi.
